# BUILDING SPECIFICATIONS

MEASUREMENT STANDARD:	REBNY
AVG. FLOOR SIZE:	37,235 SF
RENTABLE SF:	Office building 629,772 SF (includes retail in garage)
GROSS SF:	673,843 SF Gross building area
LOSS FACTOR:	20% full floor
TYPICAL OFFICE BAY SIZE:	30' x 45'; 30' x 40' and 30'x15'
FLOOR LEVELS & HEIGHT:	Steel frame with composite concrete Steel deck floors on piles and concrete caps and grade beams 13'6" finished slab to finished slab 13' ¾" finished floor to underside of deck 11' finished floor to underside of steel beam
FLOOR LOAD RATING:	Live floor load 100 lbs per SF
PARKING	Attached six-story parking structure accommodating 497 parking spaces
ELECTRICAL:	480/277V, 3 phase, 4 wire from utility company vaults constructed under the sidewalk adjacent to the building loading dock on Wayne Street near Marin. The electric service equipment consists of four 4,000 ampere switchboards, and facilities exist to provide for the addition for two more 4,000 ampere switchboards. The Switchgear room is on the lobby level in the hallway adjacent to the loading dock.  Building tenant has installed a third service from the utility company. As of this date that service has not been energized. The building is fed from two substations - Newport and Hoboken.  Public Service Electric and Gas Company (PSE&G) 80 Park Plaza, Newark, New Jersey 07101

# AWARDS

- Energy Star Certified 2010 – 2020
- MAC Region TOBY 2013  
*(The Building of the Year Mid Atlantic Region)*
- BOMA NJ Grand TOBY 2012  
*(Highest Point Earner in all Submittals)*
- Two-Time BOMA NJ TOBY Award Winner  
*(Prior to CPT Ownership)*
- Green Cleaning Since 2011

# BUILDING SPECIFICATIONS

ENERGY MANAGEMENT:	Johnson Controls Building Management Systems Metasys Model installed in 2015 by Johnson Controls. DDC controls with head end in engineering offices on the mezzanine floor. Fire system integrated.
HVAC SYSTEM AIR DISTRIBUTION SYSTEM:	Cooling and air conditioning for the building is being supplied by four built-up air handling units. The air handling units are located in the penthouse and mezzanine level mechanical rooms. Two of the air handling units are equipped with two supply air fans, two return air fans, and chilled water coils. The other two units are each with one supply fan, one return fan and chilled water coil. Each supply air fan was designed to supply approximately 100,00 CFM. The air handling units were designed to supply 2/3 and 1/3 portions of each floor. Each AHU is a variable air volume system utilizing VFD's for airflow adjustment. Conditioned air is delivered via galvanized supply ductwork to VAV units and parallel fan powered boxes located above the ceiling. From the VAV units the air is supplied to ceiling mounted diffusers. Return air pathways are via above-ceiling plenums to the AHU's.
BOILERS:	No boiler in the building. The domestic hot water supply is generated using electric hot water heaters, one per three floors.
CHILLERS:	Two Trane 800 ton electric motor driven water cooled centrifugal chillers. A modernization project was completed by Trane in 2012. The chillers utilize centrifugal compressors charged with R-11 refrigerant. Primary equipment is located in the lower level mechanical penthouse.
LOADING DOCK:	Three secured loading docks 12.5' x 42' with street level access. 7:00 AM – 6:00 PM deliveries at other times must be prearranged. Access between loading dock and freight elevator is a 6' wide corridor, 40 lineal feet.  Two dock levelers 5' x 9' are available.
VERTICAL TRANSPORTATION:	Thirteen electric 3,500 lb capacity, two hydraulic. Two of the electric are freight elevators with a 6,000 lb capacity. Cars 1 - 6 (low rise) of the passenger elevators are behind the turnstile access system of the first tenant and are solely for their use. Cars 7 and 8 (hi rise) are behind the turnstile access system of a second tenant and are solely for their use. Cars 9 – 11 (hi rise) are for multi-tenant use but after hours are controlled by a separate access system. There are also two hydraulic elevators for parking garage only. All are OTIS Elevator Equipment and a full maintenance agreement is in place with OTIS. There are two elevator machine rooms, one in the penthouse on the 19th floor, the other is on the 12th floor or the crossover floor.

# OWNERSHIP & PROPERTY MANAGEMENT

Columbia Property Trust creates value through owning, operating and developing Class-A office buildings in high-barrier U.S. office markets, primarily New York, San Francisco, Washington, D.C. and Boston. The Columbia team is deeply experienced in transactions, asset management and repositioning, leasing, development, and property management, and it employs these competencies to grow value across its high-quality, well-leased portfolio of owned and managed assets, as well as approximately eight million square feet of assets under management for private investors and third parties.

As an owner/operator, Columbia strives to maximize returns through proactive management, creative leasing and value-enhancing capital improvements, positioning its buildings to be competitive within the top tier of their markets and thereby driving strong rental rates and high occupancy. Columbia also pursues select development opportunities in its target markets and its funds under management, to enhance value and growth in its portfolio.

Columbia is listed on the New York Stock Exchange under the ticker symbol “CXP” and carries an investment-grade rating from both Moody’s and Standard & Poor’s.
